SPECIALIST PRINTING, 3D AND DIGITAL SERVICES

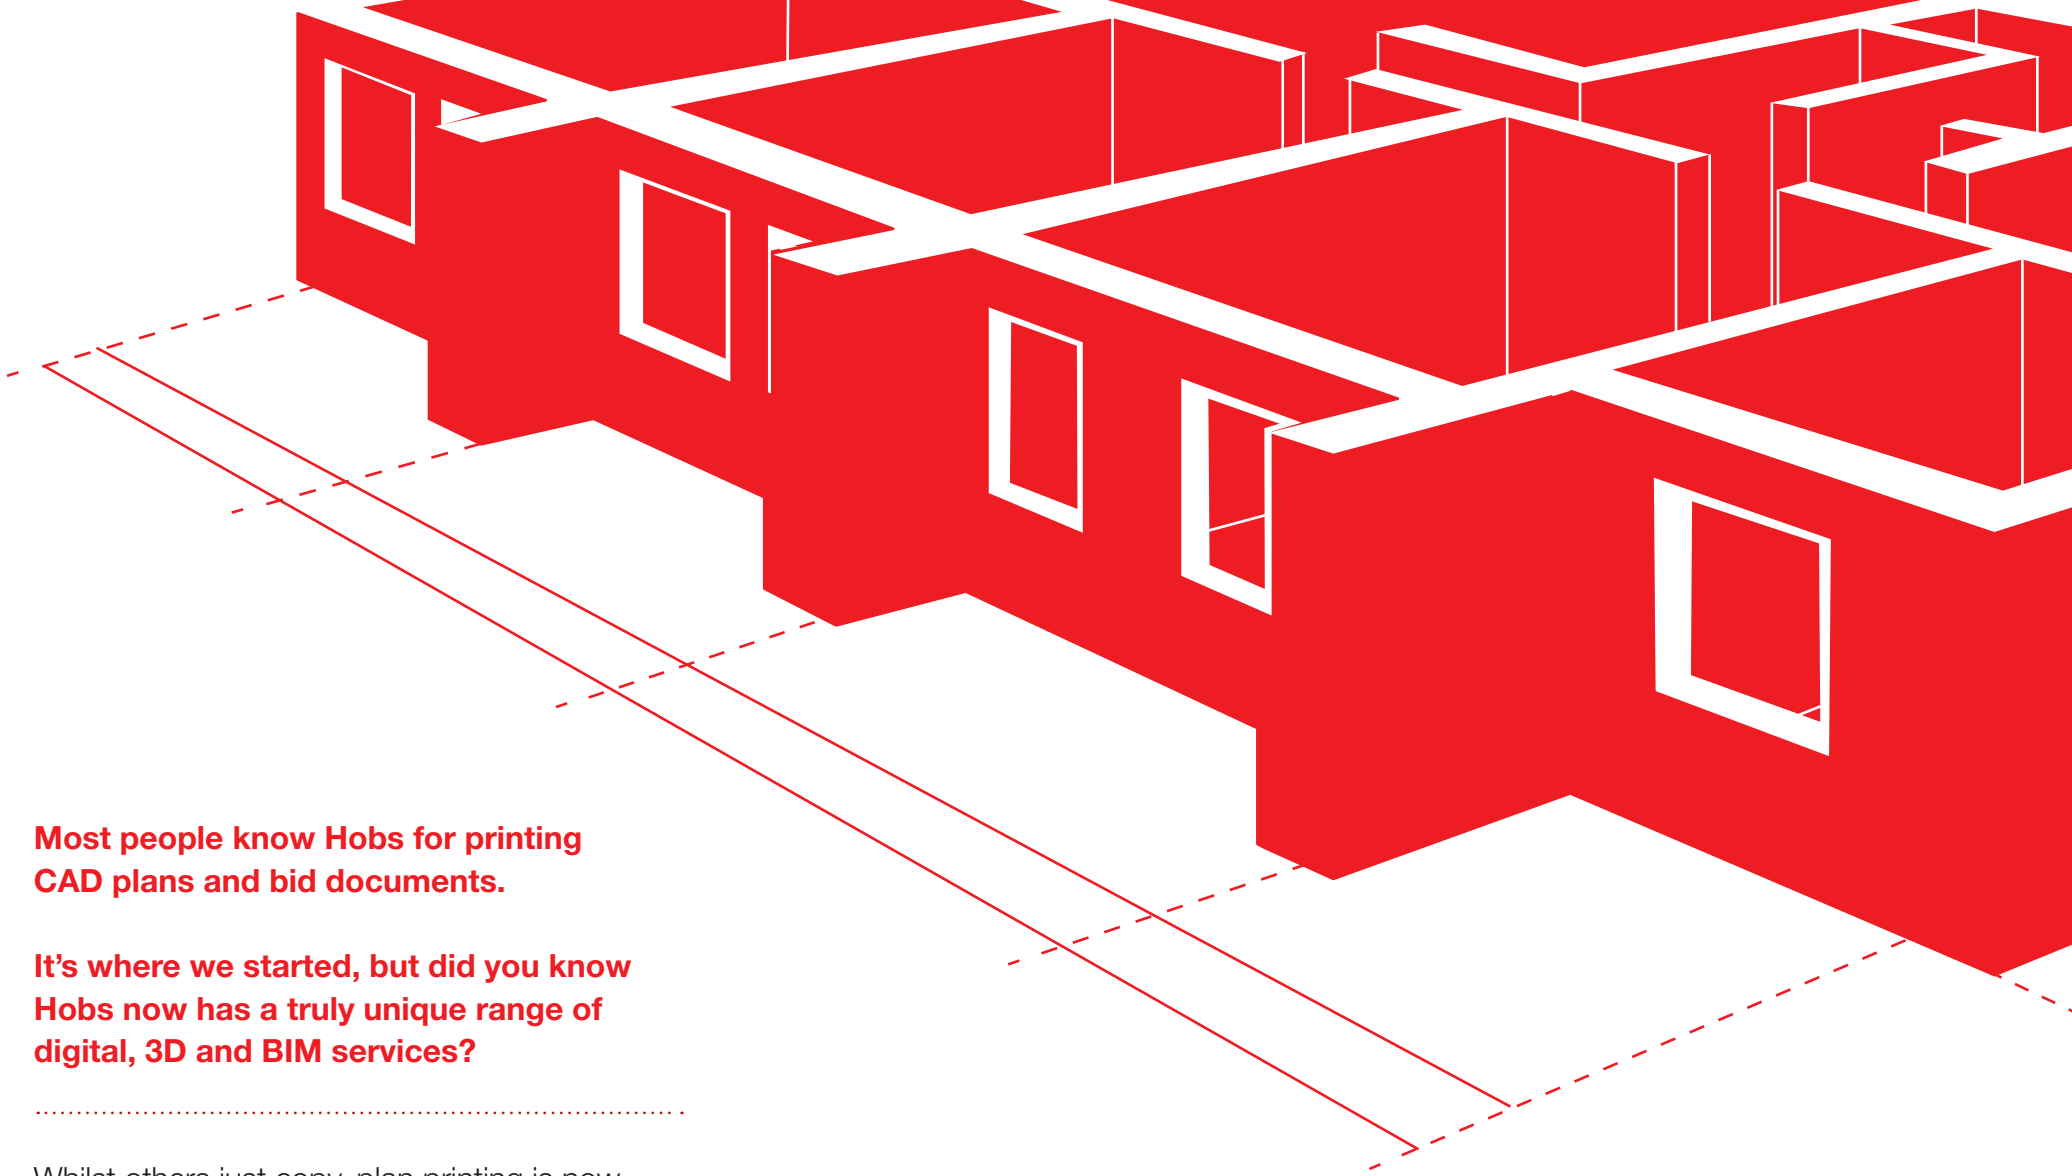

FOR ARCHITECTS, ENGINEERS AND
THE CONSTRUCTION SECTOR

hobs

THE HOBS GROUP

WE'RE UNIQUE. OTHERS JUST COPY

From its origins in Liverpool in 1969, Hobs has become the biggest, most successful independent printing company in Britain with 330 staff in 29 centres.

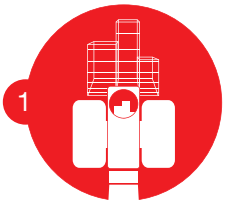

**Most people know Hobs for printing
CAD plans and bid documents.**

**It's where we started, but did you know
Hobs now has a truly unique range of
digital, 3D and BIM services?**

.....

Whilst others just copy, plan printing is now
just part of the support we give to construction
companies and Architects.

LET'S START AT THE BEGINNING...

Whether it's at feasibility, master planning, 'Invitation To Tender' or bid stage we can Laser Scan the empty site or existing buildings to give you accurate 3D data.

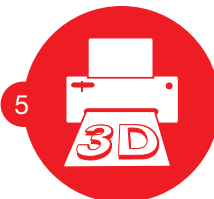

By modelling the building virtually, within a computer, we can provide an accurate model on which to base your design. Your team can even take measurements without having to visit site.

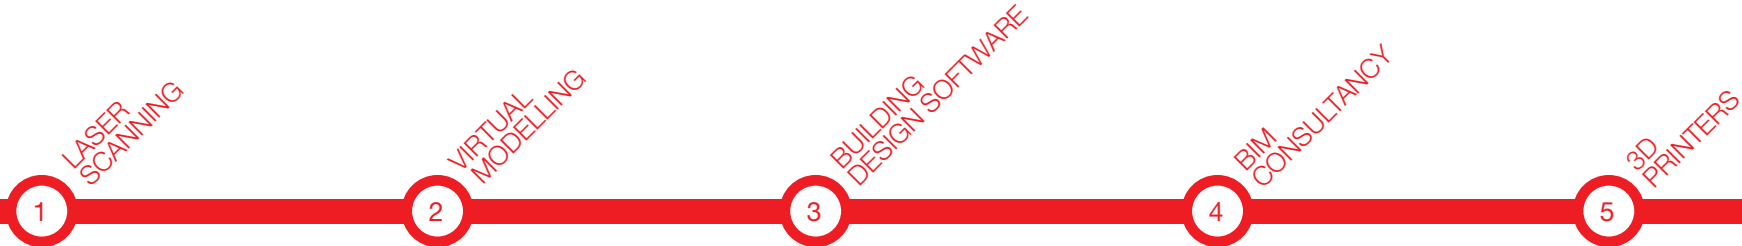

We also supply software like AutoCAD and Building Design Suite for you to create your design in.

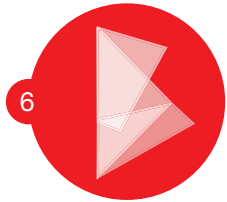

Our BIM consultancy and training can help you further your BIM capabilities.

Could 3D printing enhance your design process? We're the UK's biggest re-seller of 3D systems 3D printers.

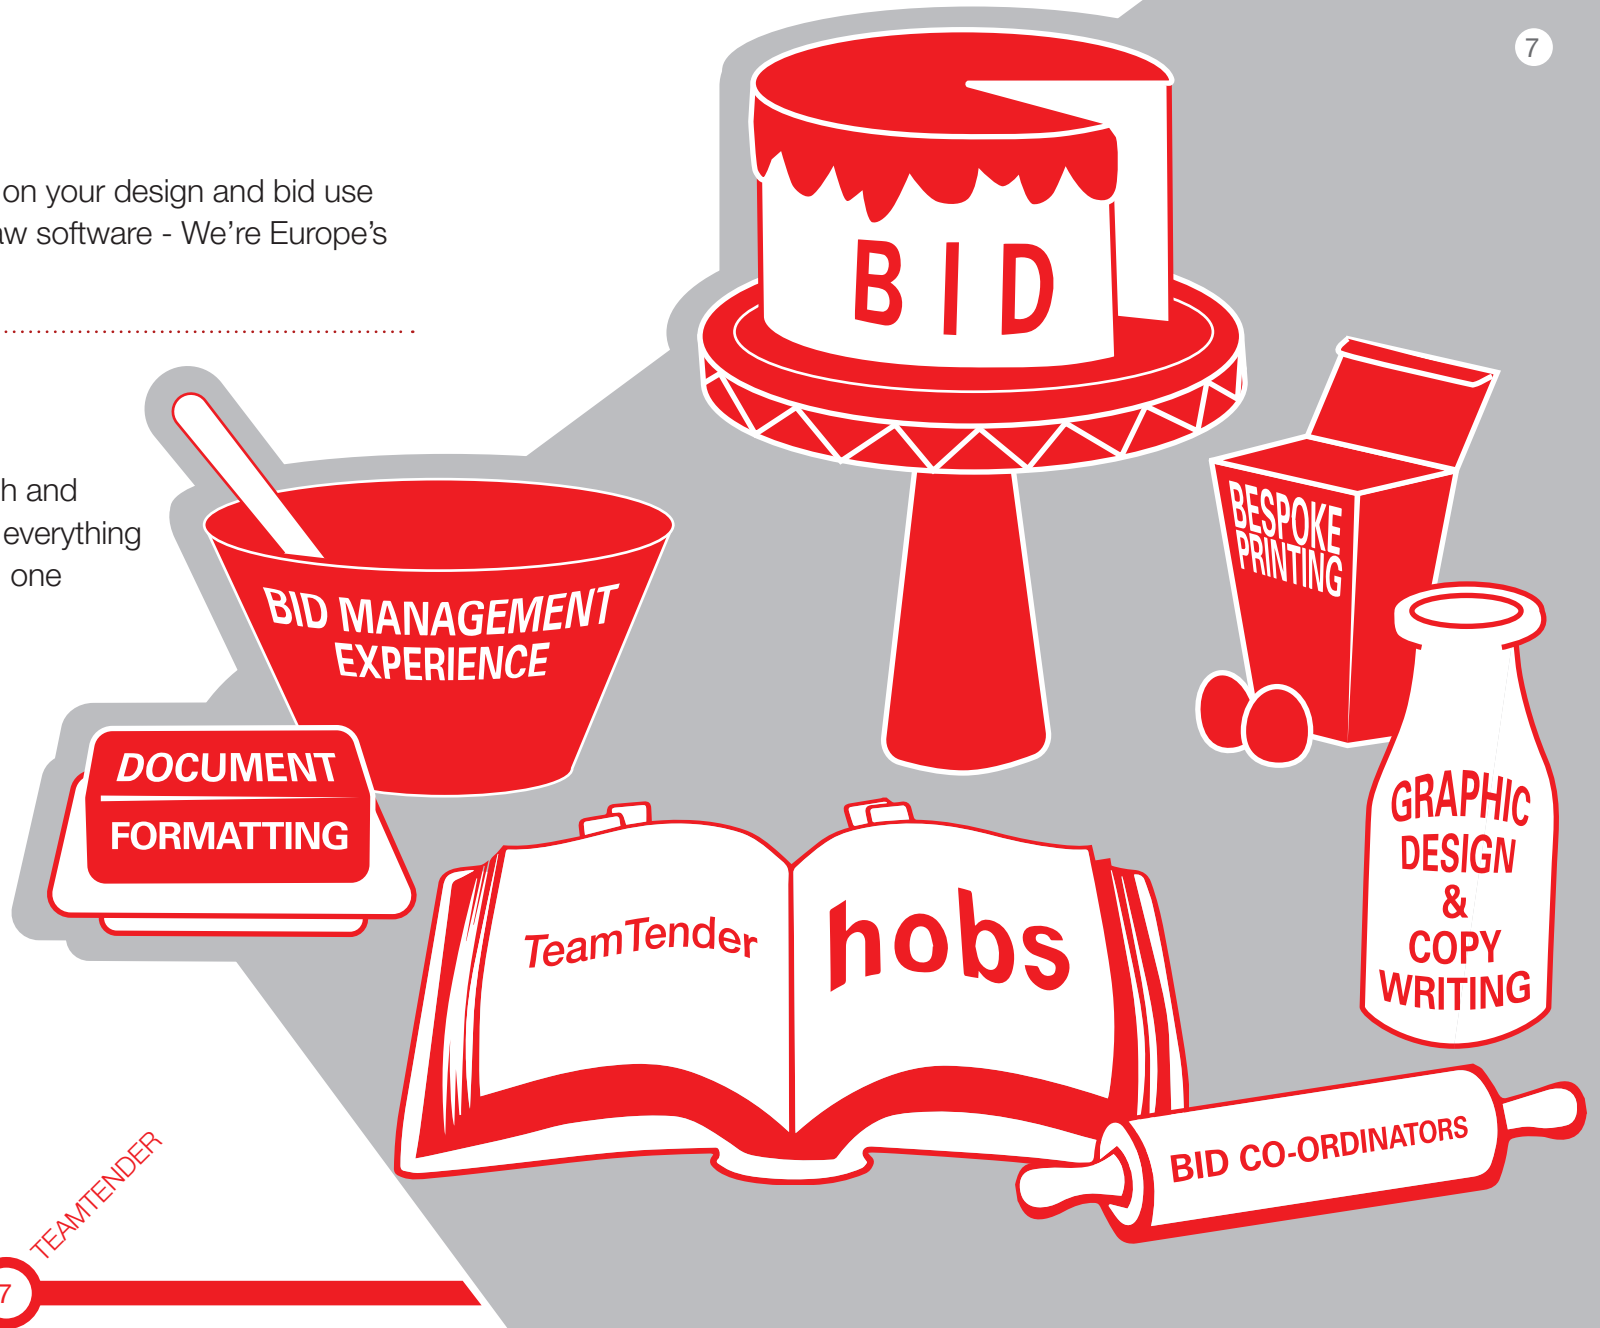

6

For collaborating on your design and bid use Autodesk Buzzsaw software - We're Europe's biggest re-seller.

TeamTender is our specialist bid, pitch and proposal resource; bringing together everything you need to create the perfect bid, in one cohesive package.

But there's often more needed for a winning presentation or when entering consultation. Enhance your bid with: **3D Prints, iPad Apps, Graphic Design, Virtual Reality, Augmented Reality, Fly-Through Animation and Photo-Realistic Visualisations.**

For presentations and consultation these can all match seamlessly with printed: **Pop-Up Displays, Banner Stands and Demonstration Boards.**

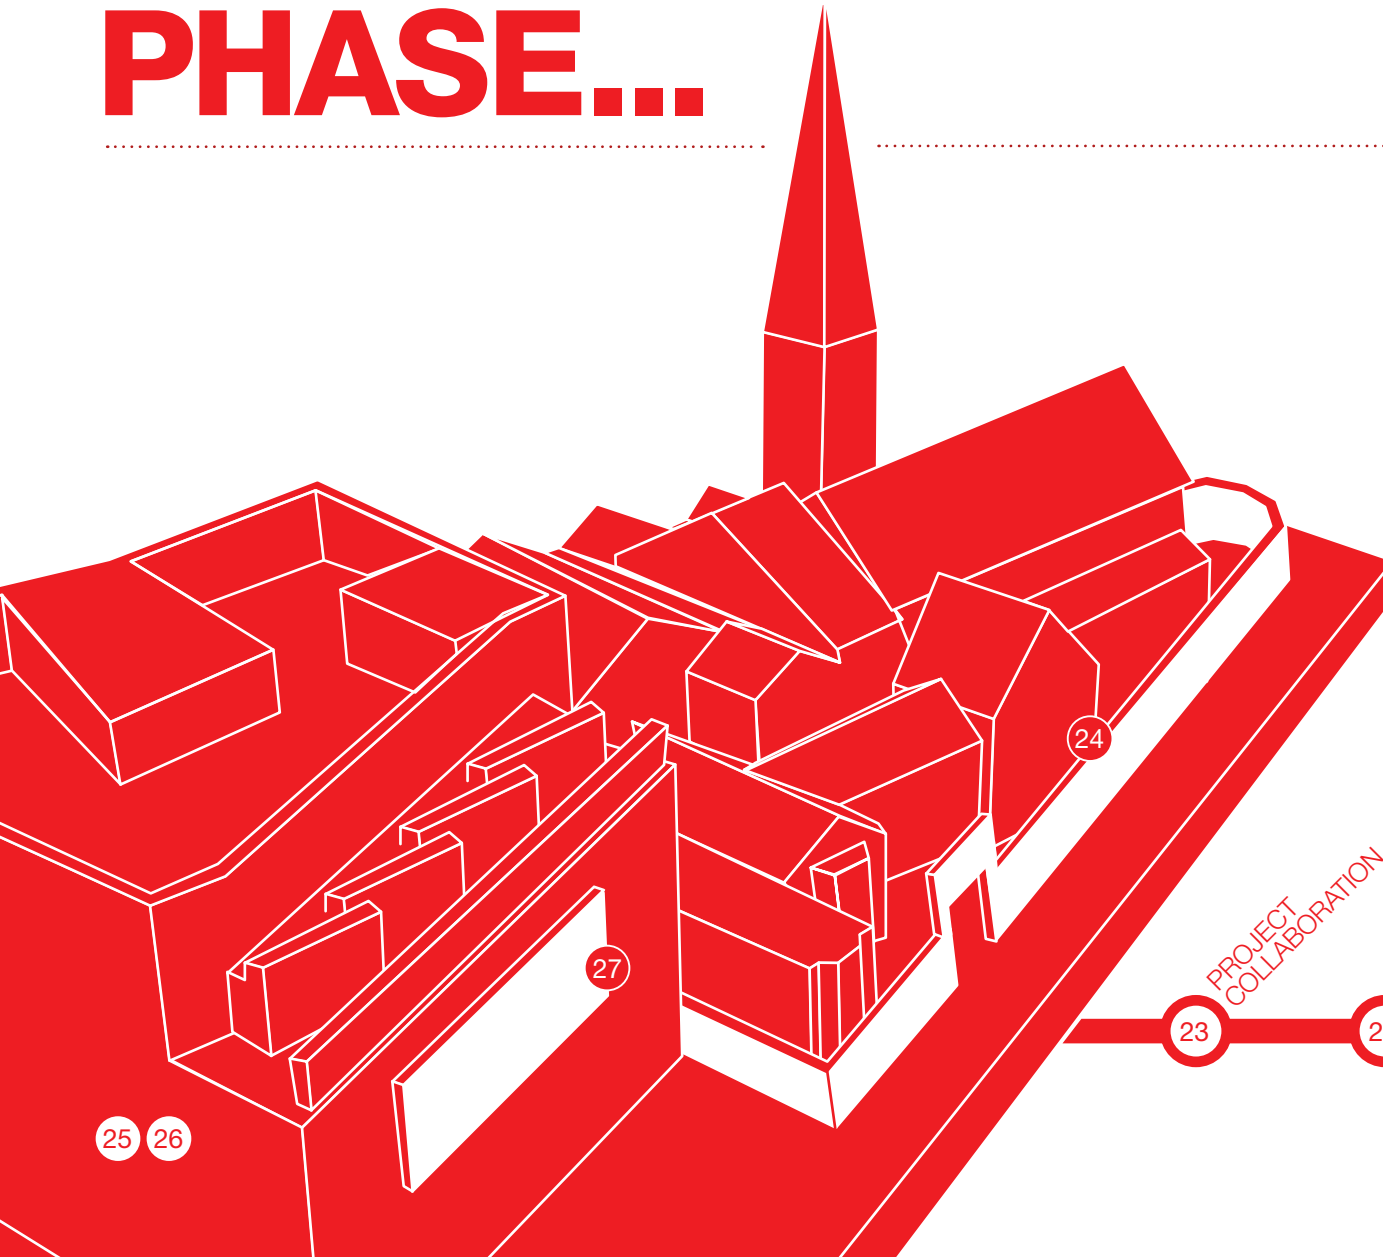

AS YOU ENTER PRE-CONSTRUCTION OR BUILD PHASE...

Add your contractors to Buzzsaw software and it seamlessly becomes your project collaboration tool. It's great if everyone's always working to the latest file version.

As part of your pre-works set-up, we can print site-hoardings using the visualizations and graphic designs created at bid stage, all complimented with directional and safety signage.

Your virtual model can be 3D printed for reference on site or to aid marketing when teamed with brochures, banners and display systems.

Hobs is founded on our plan printing service; we'll either courier them to you, or our on-site team can install printer-copiers and plan printers at your location.

Need higher print volumes? Hobs on-site can also provide document controllers or a print room operator to become part of your team.

We'll deliver all the day-to-day stationery and consumables you'll need ranging from ink cartridges to coffee and cleaning supplies.

Don't forget the Health and Safety, training or other documents the site will need printing and binding.

AS CONSTRUCTION PROGRESSES...

3D Laser Scanning can validate the build is as designed by creating an as-built model.

After the invites are printed for the grand opening, Buzzsaw software efficiently becomes your electronic Operational and Maintenance manual or asset management tool.

We can help fit out the building with signage, window graphics and wall graphics.

Our document scanning service converts all those hard copies into digital files for easy archiving.

Our on-site team can manage the installation and on-going management of all the printers and copiers, including full print room and digital mailroom operations.

At every stage of design and construction, we can help you develop your BIM protocols and document control protocols through consultancy and training.

**If there is anything else you need?
Just ask!**

**As we said, Hobs' end-to-end service
is truly unique. Others just copy.**
